ABOUT US

Brewtal: Pau's Favourite is a small business of different flavors of coffee. The word "Brewtal" was just originally made by the owner meaning "Pang-suntok sa Antok" or like "Pampagising ng Diwa". We offer different kinds of coffee such as drip pouch coffee, beans, and ground at an affordable price.

STORY

It started around the last week of January. We started our business because of my girlfriend's passion in coffee. That's why I wanted to offer her this kind of coffee so much that it became an inspiration to start the business and make it a dream come true. After we used the coffee from our respective suppliers, we decided to give it a shot as a physical coffee shop just like coffee project and Starbucks. We need to learn a lot more to have the confidence to operate and develop but we will not give up because this is my girlfriend's passion and we need to have the resilience and mindset that we can always do it.
